

The School District of Washington is planning for a Grab and Go meal service for students ages 18 and under beginning next week. Our Food Service Department will be providing these meals, both breakfast and lunch during the closure.

In order for us to properly plan, we first need to assess the need in our community. We will be offering pick up points at Washington West Elementary and Marthasville Elementary. We may also offer delivery services for families that do not have transportation to the pickup points on both sides of the river.

If you are interested in this service and feel it would be a good option for your children, please complete the google form to indicate your preferences.

The google form will be emailed to you this evening and is also located on our district website on the SDOW Coronavirus webpage. The form should be completed by the end of the day Thursday, March 19, by 4:00 p.m.

For those without the internet, you may call 636-262-2926 to participate.

Please note that your children must be present at the time of curbside pick up as well as upon delivery.
